# KNITFLEX

OUTSIDE LINING

Knitflex outer lining is our high-end stretch fabric. Compared to other, non-woven fabrics Knitflex is more durable and has a unique structure in the lining. This creates an excellent and uniform stretch in all directions making it a great outer lining for panels that really need to perform. Knitflex truly looks and feels amazing, but the fast-drying abilities of the fabric are even better. As soon as water droplets touch Knitflex they bead up on the surface. Knitflex will channel out larger amounts of water in no time resulting in a faster drying suit.

# FOX

# FLEECE

INSIDE LINING

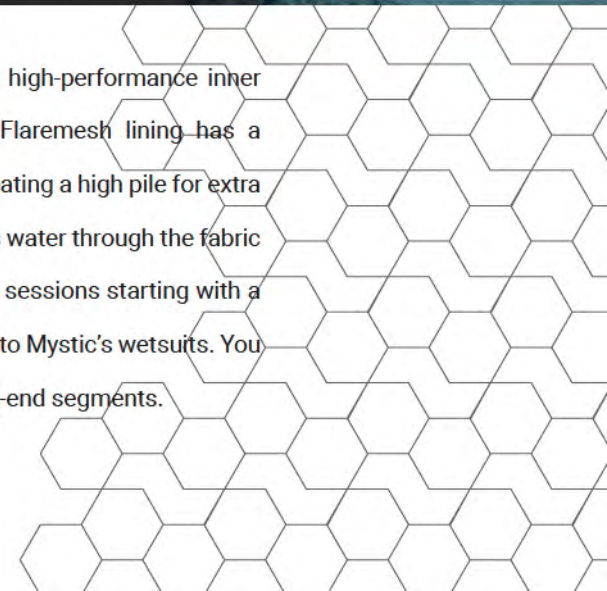

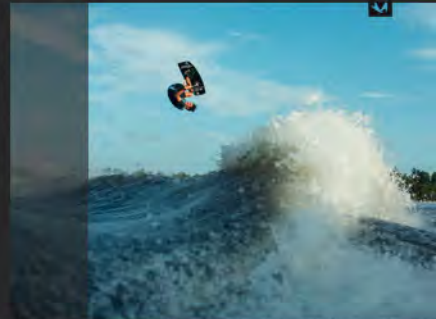

If it's soft, smooth and incredibly warm it's probably our renewed thermal inner lining called Fox Fleece. Big loops in the fabric create a high pile lining that holds air for extra insulation. The fleece also holds less water enhancing the fast-drying abilities of the fabric. Fox Fleece has superior stretch performance in all directions making it super suitable for every panel in all of our suits.

# FLAREMESH

INSIDE LINING

Our Mystic design team managed to create a new high-performance inner lining with excellent stretch and heat reflection. Flaremesh lining has a carbon backing and is topped with big terry loops creating a high pile for extra insulation and a soft touch. Flaremesh also channels water through the fabric to decrease drying time. This finally puts an end to sessions starting with a wet and cold suit. The jacquard knit design is unique to Mystic's wetsuits. You will find Flaremesh in several products from our high-end segments.

# NEOPRENE FABRICS

FLAREMESH (INSIDE LINING)

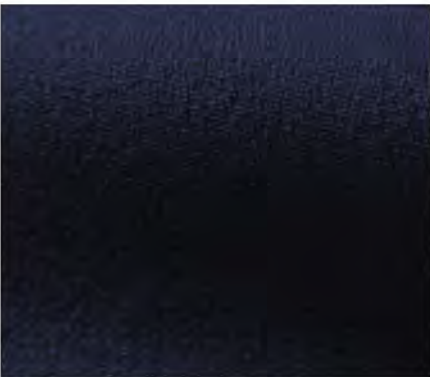

The Flaremesh quick dry lining is a special development for Mystic and offers a super soft feeling. The fabric is made with carbon to keep you warmer than ever.

FOXFLEECE (INSIDE LINING)

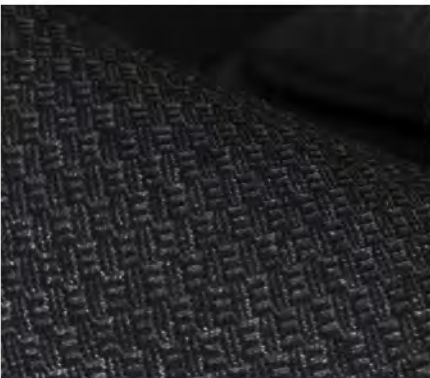

Big loops in the fabric create a high pile lining that holds air for extra insulation. It holds less water enhancing the fast-drying abilities of the fabric. With its superior stretch performance in all directions it's super suitable for every panel in all of our suits.

XTR LINING (INSIDE LINING)

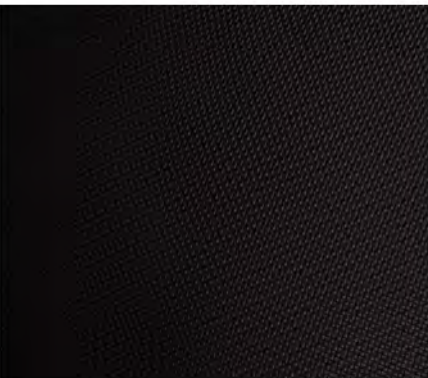

This thermal lining on the High End wetsuits is added to help retain heat and comfort next to the skin.

KNITFLEX (OUTSIDE LINING)

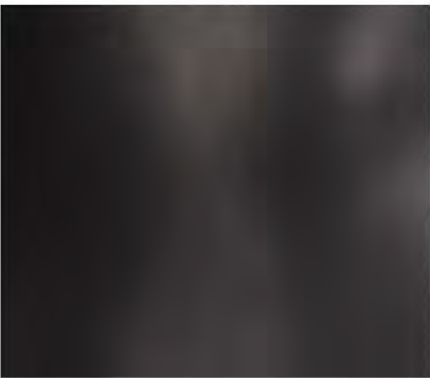

The Knitflex lining offers the highest stretch ratio in all directions, it has a more luxury look and soft touch feeling.

WIND MESH (OUTSIDE LINING)

Closed cell neoprene with one side of fabric lamination. The outside of the mesh neoprene offers a better protection against wind chill.

JAKO V2 (OUTSIDE LINING)

A high density single lined neoprene. This is a very durable smooth neoprene with high stretch and prevents the users from wind chill.

M-FLEX 2.0 - 100%

MFlex 2.0 the most flexible neoprene in our range. M-Flex 2.0 is updated with even better stretch / durability and flex properties.

M-FLEX - 100%

M-Flex is a very good flexible neoprene. M-Flex stands for high quality neoprene with an awesome stretch ratio.

M-FLEX - 75%

M-Flex 75% M-Flex is a good flexible neoprene. M-Flex stands for high quality neoprene with an market confirm stretch ratio.
